

Kochab Cheat Sheet

An honest, human-in-the-loop job search that runs inside Claude. It drafts; you always send. No auto-apply, no scraping behind logins, no fake confidence scores, nothing invented. Say things your own way; the phrases below are examples.

KOCHAB

the star you steer by

1 FIRST RUN (SETUP)

Point Kochab at a folder and share your resume. It then:

- interviews you and writes **Master_Profile.md**, including your **honesty guardrails**
- seeds a **story bank** from your resume
- researches a **target-employer list** for your field
- asks how hands-on you want it (the coaching dial)

Then the scan can run on a schedule. Your data stays in your folder.

2 FIND & APPLY

Scan. ("run my job scan")

New roles, deduped against your tracker, each with a fit score, a named gap, a why-you-fit line, and a legitimacy check. Thin days reported honestly.

Draft. ("write a cover note for X")

A short note from a real hook and your stories, never a restatement of the posting. You edit and send.

Plan. ("what should I study?")

A study plan shaped by your real weekly hours, aimed at one closable gap, with real resources.

Resume. ("tailor my resume for X")

A variant built by subtraction from your profile. Never adds anything untrue.

3 INTERVIEW & STAGES

Interview. ("prep me for the X interview")

Likely questions mapped to your real stories, questions to ask, thin spots handled honestly. Tuned to the format: screen, panel, or onsite.

Stage guidance. ("what does this stage expect?")

What each phase is for and what comes next, plus how to handle references (who to ask, when, how to brief them).

4 RUN THE WHOLE SEARCH

Pipeline. ("I applied to X" "where do I stand?")

One tracker holding every application's stage, next action, and timing, with a status view of what is due and what collides this week.

Momentum. ("should I follow up?" "not interested in X")

Follow-up timing (capped, never pestering), nudges to get drafts sent, post-call capture, one-step decline.

5 OFFERS & PROCESS HEALTH

Offer. ("I got an offer" "help me negotiate")

The whole offer weighed against your priorities and floor, and an honestly-anchored counter drafted for you to send. Never fabricated leverage.

Process health. ("I got rejected" "how is my search going?")

Honest rejection recovery, a gracious withdrawal note, and a light read of your own funnel with no false precision.

6 NETWORK (BOUNDED)

Network. ("do I know anyone at X?")

Contacts from your own LinkedIn export or a paste, matched only to an employer you intend to apply to, with a warm outreach note to send yourself. Never scraped, never a blanket scan.

7 COACHING DIAL

("be more hands-on" "just hold things, let me ask")

Turns how much Kochab nudges and coaches up or down.

Light by default. It changes how much Kochab speaks, never how honest it is.

8 HOW FIT IS SCORED

Six sub-scores, 0 to 3 each, shown together with a named gap. Never a bare number or a percentage.

core-skill	level	domain
location	mission	screens
Strong	14–18, no zero on core-skill, level, or screens	
Stretch	9–13 (or higher with one capping zero)	
Skip	8 or below, or breaks a hard no	

A zero on core-skill, level, or screens caps a role at Stretch, however high the total.

9 THE RULES THAT NEVER BEND

Never: auto-submits, fills a form, scrapes behind a login, invents a skill or credential, or shows a fit score as an objective number.

Always: tells you the truth. It will call a role a Skip, tell you when you do not clear a screen, and report a day with nothing new. That honesty is the point.

Your data stays in your folder, on your machine, and is never shared.
